Applicable Criteria

- [Tax-Supported Rating Criteria, Aug. 16, 2010](#)
- [U.S. Local Government Tax Supported Rating Criteria, Oct. 8, 2010](#)

Rating Rationale

- The ‘A-’ rating reflects the city of El Monte’s low unreserved general fund balances over the past few fiscal years, moderate taxable assessed valuation (TAV) declines, and low socio-economic indicators, including very high unemployment and low income and wealth levels.
- The rating also reflects the lease structure, in which the city covenants to budget and appropriate the essential nature of the pledged assets (the public works yard and civic center) and other standard bondholder protections.
- Although a general fund lease obligation, the rating incorporates the uncertain nature of the revenues the city intends to use to pay debt service, including tax increment revenues from two El Monte Redevelopment Agency (the agency) project areas and from the city’s water and sewer funds, as well as the general fund’s ability to pay a portion of debt service, if required.
- While the city’s financial reporting has been weak in the past, new management has taken steps to improve both reporting and performance, including cuts to expenditures.

Key Rating Drivers

- Payment of debt service from the tax increment areas and water and sewer funds to limit the impact on the general fund.
- Maintenance of at least adequate general fund balances, with a view to increasing the unreserved portion.

Credit Summary

The ‘A-’ rating for the series 2010 bonds reflects the city’s covenant to budget and appropriate lease rental payments to the El Monte Public Financing Authority for use and occupancy of the city’s civic center and public works yard, with the general fund as the ultimate security, and standard bondholder protections, including a reserve fund and rental

Considerations for Taxable Bond Investors

This sector credit profile is provided as background for investors new to the municipal market.

Local Government Appropriation-Backed Bonds

The unlimited taxing power of most local government general obligation pledges is the broadest security a U.S. local government can provide to the repayment of its long-term borrowing and, therefore, is the best indicator of its overall credit quality. Some debt repayment requires annual legislative appropriation, and this lesser long-term commitment to repayment is reflected in a lower rating than that of the general obligation rating, usually by one to two notches.

The average local government general obligation rating is ‘AA’, with approximately 85% rated at or above ‘AA-’ and 1% rated ‘BBB+’ or below. The relatively high ratings reflect local governments’ inherent strengths: the authority to levy property taxes, nonpayment of which can result in property foreclosures; additional taxing power that can include sales, utility, and income taxes; and essentiality of and lack of competition for services provided by local governments. Those with low investment-grade or below-investment-grade ratings generally have a combination of a limited or highly volatile economic base, high levels of long-term liabilities, including debt and post-employment benefits, and/or unusually limited financial flexibility. For additional information on these ratings, see “U.S. Local Government Tax-Supported Rating Criteria,” dated Oct. 8, 2010, available on Fitch’s Web site at www.fitchratings.com.

Rating History

interruption insurance. The city expects that the lease rental payments will be paid from several revenue streams as follows: tax increment revenues from the agency's Northwest and Valley-Durfee project areas; and net revenues from the city's water and sewer funds. The leased assets — the civic center complex and the public works yard — have been appraised at \$12.25 million and \$8.6 million, respectively.

The city of El Monte is located about 12 miles east of downtown Los Angeles in the San Gabriel Valley. Covering about 10 square miles, it is adjacent to the junction of the San Bernardino Freeway (I-10) and the San Gabriel River Freeway (I-605). It currently has a population of about 125,500 and a mix of residential (54%), commercial (16%), industrial (15%), and retail (7%) development. Top private employers include Wells Fargo Bank (1,800 employees), Vons Grocery Co. (736), and Longo Toyota-Lexus (600). The city has had consistently high unemployment; as of August 2010, the rate was 15.9%, compared with 12.1% for the Los Angeles metropolitan statistical area (MSA). Additionally, the city has relatively low incomes; its median household income was at \$42,363 in 2008, or 71%, 69%, and 81% of the Los Angeles MSA, state, and national levels, respectively.

TAV has held up relatively well in the recent downturn, showing a small decline in fiscal 2010 (0.1%) and a larger drop in fiscal 2011 (2.1%). Taxpayer concentration is low, with the top 10 comprising just 6% of TAV. In addition, delinquencies were down to 3.4% in fiscal 2010 from 4.7% in fiscal 2009, although still above a low of 2.2% in fiscal 2004. Fitch data show high rates of nonconventional loans and high foreclosure rates; foreclosures were at 10.6% in second-quarter 2010, similar to the Los Angeles MSA rate of 10.3%.

General Fund Financial Summary

(\$000, Audited Fiscal Years June 30)

Note: Numbers may not add due to rounding.

The city’s finances have been poor, with undesignated, unreserved general fund balances of 3% or less of spending for the past three years, including funds designated as working capital, before increasing to 8.9% (\$4.3 million) in unaudited fiscal 2010. While overall general fund balances are large, with a five-year average of 108% of expenditures, they are primarily reserved for advances to other funds, which are comprised of loans due from the redevelopment agency not expected to be repaid until the project area bonds are repaid. Furthermore, unless the city is able identify additional sources of revenue, it will be forced to close one of its recently reopened fire stations or face a structural imbalance of about \$2.3 million in fiscal years 2013 and 2014. General fund expenditures decreased overall by 7.4% in 2009 and 13.7% in fiscal 2010, including furloughs, a reduction in staff, and a reduction in medical cost contributions. Public safety accounts for about 70% of general fund spending; as the city already cut public safety expenditures by nearly \$5 million in fiscal 2010, its ability to control spending growth may be challenged going forward. The city budgeted flat general fund operations for fiscal 2011.

The city intends to make the annual lease payments of approximately \$1.9 million prior to the Recovery Zone Economic Development and Build America Bond interest subsidies from available revenues from the water and sewer funds, as well as two redevelopment agency project areas. However, the ability of the water and sewer funds to pay their portion of debt service is unclear. According to the city, the water fund financial statement has contained an error for many years; a \$17 million prepaid lease was stated as a liability, without the offsetting asset. Thus, the fund balance should be \$6.8 million instead of negative \$11 million. With the restatement, debt service coverage is at least 1.26x, including the rate stabilization fund (balance of \$400,000) but providing for no revenue growth. This coverage falls to less than 1.0x starting in fiscal 2027 without the stabilization fund. The sewer fund has never appeared in the city’s financial statements as a separate enterprise but has been accounted for in the general fund. In July 2008, the City Council adopted an ordinance that allows the city to assess a sewer charge, collected on the property tax bill, which may be increased at a rate of the lesser of 4% or the percentage change in the Los Angeles MSA consumer price index. According to projections provided by the city, debt service coverage on the sewer portion of debt service by this new assessment is at least 1.5x. The redevelopment project areas show adequate debt service coverage (2.0x and 1.7x for fiscal 2012) for their portions of the 2010 payments.

Debt and Other Long-Term Liabilities

El Monte’s direct debt burden is low with just one general fund obligation outstanding, resulting in net direct debt at \$216 per capita, or just 0.5% of TAV, including the series 2010 issuances. Total direct and overlapping debt rises to a still moderate \$1,770 per capita, or 3.7% of TAV. The general fund debt service obligation is currently very low and, in the worst case scenario, in which the general fund is called upon to repay the entire series 2010 bonds and no general fund revenue growth occurs, aggregate debt service would represent a moderate 5.8% of total general fund revenues. The city does not have any plans for additional debt.

In issuing and maintaining its ratings, Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings can be affected by future events or conditions that were not anticipated at the time a rating was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion is based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at anytime for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of Great Britain, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.
